surcharge for intraLATA **services**. )

EXPEDITED APPLICATION DOCKET

EXPEDITED APPLICATION TO RESTRUCTURE HIGH  
SPEED **DIGITAL PRIVATE LINE SERVICES** AND  
IMPLEMENT OFF-SETTING SURCHARGE

Pursuant to Decision Nos. 88-08-059 and 88-09-059 of this Commission dated August 24, 1988, and September 28, 1988 respectively, the Modified Phase I Settlement adopted therein, and the expedited application procedures contained in Appendix A attached thereto, Pacific Bell (U 1001 C; "Pacific") respectfully requests approval of this Application to restructure high speed digital private line services, including **changes** to permit limited intraLATA use of high speed digital services under Pacific's special access tariff, Schedule Cal.P.U.C. No. 175-T, and to implement an off-setting surcharge.

I.

INTRODUCTION

On November '25, 1987, the Commission commenced Investigation No. 87-11-033 to investigate, inter alia, changes in the regulatory treatment of Local Exchange Companies (LECs) in California. The Commission directed that a host of issues be considered in three separate Phases, the first of which was limited pricing flexibility for centrex, vertical, and high speed digital private line services, and the introduction of further intraLATA high speed digital competition (D. 88-08-059, **August** 24, 1988, p. 4). Just prior to the commencement of hearings, settlement negotiations began, resulting in a proposed Settlement which was submitted to the Commission for review (Id.). In Decision No. 88-08-059, the Commission indicated that it intended to adopt the Settlement if the parties accepted certain modifications. After soliciting and reviewing the parties' responses to its modifications, the Commission, on September 28, 1988, issued the Modified **Phase I** Settlement (hereinafter "Settlement").

These Commission decisions and the Settlement contain the conditions by which Pacific may effect changes in the provision of its high speed digital services. They provide, for example, that Pacific is to submit an Expedited Application

restructuring its intraLATA (Schedule Cal.P.U.C. B9; hereinafter "B9" tariff) and special access (Schedule Cal.P.U.C. 175-T; hereinafter "175-T") tariffs to adopt a common element of private line service from a customer's premise to the serving central office (D. 88-08-059, mimeo, conclusion of Law No. 7, p. 84; Appendix A, p. 4). Pacific was also directed to adopt a rate element in its intrastate special access tariffs, priced at cost. for connections from an interexchange carrier's premise to its serving wire center (Id., Appendix A, p. 10). Additionally, Pacific was permitted to provide intraLATA access for authorized high speed data providers (Id., Appendix A, p. 8). The Commission also authorized Pacific to implement an off-setting surcharge for revenue requirement increases resulting from these changes (Id., Appendix A, p. 10). Last, the Commission authorized Pacific to adopt, if it chooses, flexible prices for certain elements of its B9 high speed digital service (Id., Appendix A, p. 12).

Pursuant to **the** Commission's directives **and** the Settlement, Pacific has revised its B-9 and 175-T tariffs **and**, by this Application, Pacific seeks the Commission's approval of the attached revised tariff **sheets**. In addition, Pacific proposes language changes to its B9 tariffs which allow greater connectivity of **other** services to high speed digital services. Pacific also proposes language changes in 175-T which will permit

the limited intraLATA use of such services consistent with the terms and conditions approved in Decision Nos. 88-08-059 and 88-09-059. As revised, Pacific's 175-T will provide intraLATA access for high speed digital services.

## II.

### FORMAL REOUIREMENTS

Applicant, Pacific Bell, is a corporation organized under the laws of the State of California. Its principal place of business is 140 New Montgomery Street, San Francisco, California 94105.

Correspondence and communications in regard to this Application may be addressed to:

Michael J. Miller  
Pacific Bell  
140 New Montgomery Street, Rm. 1814  
San Francisco, California 94105  
Telephone: (415)-542-1266

Counsel should direct communications, motions, letters, and requests for information to Pacific's attorneys in this matter:

Marlin D. Ard  
Ronald R. McClain  
Pacific Bell  
140 New Montgomery Street, Rm. 1517  
San Francisco, California 94105  
Telephone: (415)-546-5705

A copy of Pacific's Articles of Incorporation, as amended, **was** filed with the Commission on April 11, 1984.

III.

RELIEF REQUESTED

Pacific requests the following relief:

1. Changes in the intraLATA B9 tariffs;
2. Changes in the special access 175-T tariffs; and,
3. Approval of the requested off-setting surcharge,

Each is discussed below.

~~A. IntraLATA High Speed Digital Services (B9)~~ These tariffs are utilized by end user customers to obtain intraLATA high speed digital service. Pacific offers connections between a customer's premise and its serving wire center (central office) through a Local Distribution Channel ("LDC"). Four LDCs (Types A, B, C and D) are available, with Type A constituting the basic, non-multiplexed, digital facility offered by Pacific<sup>1</sup>.

---

<sup>1</sup> Type B LDC offers one or two full duplex channels (64 channels **with** the equivalent of 24 or 48 voice grade channels) delivered at the customer's premise similar to Type B, with multiplexing (24 or 48 voice grade channels) available at Pacific's serving central office. Type D provides non-multiplexed high speed digital services between Pacific's central offices. Today, it is typically used with Centrex service.

Consistent with the Settlement terms, Pacific requests that the Commission approve these changes to its B9 tariffs:

1. - The recurring charge for **Type A** LDC is lowered from \$725.00 to \$162.59, which still covers its embedded direct costs. This same charge will apply to the comparable connection available under Pacific's special access tariffs, as described below. This comports with the Settlement provision requiring Pacific to price its connections from a customer's premise to the serving central office at the same level in these tariffs. (Settlement, Part IV (A) (2)).
2. Pricing flexibility is requested for recurring and nonrecurring charges for LDC Types B, C and D, and inter-office mileage charges (connections between Pacific's central offices). These prices are capped at the existing rates, floored at or above their embedded direct costs, and Pacific has set forth the current rate it intends to charge for these services under its pricing flexibility tariffs. The proposed tariffs also state that no change in rates within these prescribed bands may

be made except upon 30 days notice to the Commission.

3. On the basis of the price reductions discussed herein, Pacific requests permission to eliminate its bulk discount for Type A LDC.
4. Pacific proposes a set of rates which shall apply to the physical moves and changes in tariff designations.
5. Pacific proposes adding tariff language making clear that other local exchange private line services (B tariff services) may be connected to Pacific's intraLATA high speed digital service.
6. Pacific intends to implement the tracking and monitoring requirements contained in the Commission decisions and the Settlement.

These provisions are reflected in the proposed tariff sheets in Attachment 1. Also, Pacific has provided to the Commission staff (Legal, CACD and DRA) the cost support and workpapers upon which the price changes are predicated. Pacific's cost support data and associated workpapers are confidential and proprietary because they contain cost and quantity estimates used by Pacific to restructure its intraLATA high speed digital rates. Many of the parties to the Settlement and other interested parties are or will be Pacific's competitors

in providing high **speed** intraLATA digital services; therefore, Pacific can be competitively disadvantaged by having to indiscriminately share its cost support data and demand estimates with all parties. For these reasons, Pacific, pursuant to the Commission's directive, asserts the confidentiality of its workpapers and cost support data (D. 88-08-059, mimeo, Appendix A p. 4). Pacific will make these materials available to requesting parties upon the execution of an appropriate non-disclosure agreement.

Pacific strongly urges adoption of these changes. First, they are in line with the terms of the Settlement and aforementioned Commission decisions, and reflect Pacific's understanding of the parties' **expecta** agreement. Second, they prepare Pacific for the substantial competition that now exists and which can be expected to increase as a result of further **intraLATA** high speed data competition allowed by the Settlement. While Pacific must bring on price reductions to meet this competition, by doing so it will **benefit** the users of these service with **high** quality service at lower rates than now exist. Third, these changes will aid Pacific in obtaining the maximum use of its **ork** facilities, address, in part, "cream skimming" entry by **some** providers in high density areas, and help the market place determine who **are** efficient providers of these **types** of services.

B. Special Access High Speed Digital Services (175-T).

Pacific requests that the Commission approve the following changes:

1. In conformance with the Settlement, the end user to central office connection price reduction identified above in the B9 tariffs (a recurring charge of \$162.59 for a Type A LDC) will be matched in the 175-T tariff.
2. Further, as required by the Settlement, the connection from an interexchange carrier's premise to the serving central office (CO to POP) will be repriced to recover its direct embedded cost, and **no more**. This results in a substantial price reduction to \$60.57 per access connection.
3. These changes result in substantial cost reductions, however, the transport rates have been increased in order to maintain parity between the B-9 and 175-T tariffs.

4. For Commission authorized intraLATA providers, limited intraLATA access is also available under 175-T for high speed digital services. The restrictions contained in D. 88-08-059 apply to these services.

The tariff sheets showing these changes are contained in Attachment 2. Pacific has provided to the Commission Staff (Legal, CACD, and DRA), the cost support and associated workpapers upon which the revised tariffs are predicated. These workpapers and cost support data are also confidential and proprietary because they contain the estimated quantity changes and cost estimates for each of the products cross-elastic with Pacific's special access high speed digital service which Pacific had to develop in order to compute the projected impact upon its revenue requirement. Obviously, this information . . . . . confidential to Pacific and cannot be shared in unrestricted fashion with potential competitors in the marketplace without competitive harm to Pacific. Therefore, Pacific asserts the confidentiality of these special . . . . . and cost support data, as the Commission has directed (D. 88-08-059, Appendix A, p. 4), and will make them available only to requesting parties who execute an appropriate nondisclosure agreement.

Again, the reasons for these proposed changes are those described above for the B9 tariff changes. They are aimed at complying with the terms of the Settlement, and will permit Pacific to meet the rapidly emerging Competition for these types of facilities and services.

c. Off-Setting Surcharge The Settlement permits Pacific to recover in a surcharge, revenues lost due to some of the price reductions explained above. Pacific has limited recognition of lost revenues due to price reductions to price changes in the B9 and 175-T tariff elements for the end user to serving central office connection, and, in 175-T, for the interLATA access connection (interexchange carrier to serving al office). Pacific **has** also reflected cost savings and revenue losses estimated **due** to shifts in demand for cross-elastic services. Attachment 3 states the estimated revenue requirement shift. Attachment 4 has **the** proposed tariff sheet adjusting the sur-credit to reflect this change. The <sup>1989</sup> impact (\$13.9 million) is to reduce the sur-credit (equivalent of

an increased surcharge) by approximately two-tenths of one percent.<sup>2</sup>

The Commission directed all carriers who file surcharge proposals in an expedited application docket to provide notice of that filing at the time it is made (D. 88-08-059, mimeo, p. 67). Pursuant thereto, Pacific will give notice as follows:

1. Provide a copy to the State of **California** through the office of the Attorney General and the Department of General Services.
2. Provide a copy to each county by mailing same to the County Counsel and County Clerk:
3. Provide a copy to each city, by mailing same to the City Attorney and City Clerk;
4. Provide a copy to all **parties of record** to proceedings  
A. 85-01-034 and I. 87-11-033;
5. Publish a notice of this Application in a newspaper of general circulation within **each** county in the **State**; and,

---

2

**Though Pacific has shown the billing effect of the price reduction and the surcharge, the booked revenue impact after settlements has not been shown. Pacific believes that the issue of how to treat individual pricing changes and their impact on settlements is an industrywide concern which more appropriately should be decided in any workshops which are held.**

6. Provide notice of this Application to all of its customers by use of bill insert in the next regular billing cycle.

#### IV.

#### RATE COMPARISONS AND TARIFF SHOPPING

Decision No. 88-08-059 (mimeo, pp. 67-68) requires that Pacific's Application set forth a comparison of the high speed digital rates available under its local exchange and access tariffs, and **address** the concern **over** tariff shopping,

Rate comparisons are shown in Attachment 5, and Pacific has provided the following information. First, Pacific has shown a diagram of network connections (including basic tariff elements) for B-9, 175-T and FCC Tariff No. 128 service. Pacific has assumed a circuit with five interoffice miles for its rate comparisons. The comparisons of the existing and proposed rates for B9 and 175-T, and existing and **proposed** F.C.C. Tariff No. 128 rates show the favorable influence of Pacific's proposed changes in reducing tariff shopping opportunities. Recurring prices in B9 and 175-T for comparable components are nearly identical. In addition, it is Pacific's intention to seek price reductions in its F.C.C. Tariff 128 high speed digital rates in its next filing before the FCC covering these services. Pacific

expects to make that filing in December, 1988.<sup>3</sup> When this occurs, Pacific expects that few price differences will exist between these three tariffs for high speed digital services, further decreasing the opportunities for tariff shopping.

V.

EX PARTE RELIEF IS REQUESTED

The Settlement and its related decisions set forth a procedure designating workshops to review Expedited Applications **such** as this one (D. 88-08-059, mimeo, Appendix A, p. 4). Pacific is prepared to begin those workshops as soon as possible **in order that** prompt approval of its Application may be obtained. Decision No. 88-08-059 further indicates that in the event the parties determine that **workshops** are unnecessary, the Commission may proceed immediately to approve Pacific's Application on an ex parte basis (Id.). In the **event** workshops are not required, Pacific requests that its Application be so approved .

---

<sup>3</sup> Moreover, in addition to this planned reduction, Pacific may, if permitted, make reduction in its interstate high speed digital rates in advance of this date.

VI.  
CONCLUSION

Pacific seeks herein only to effect the restructuring of its high speed digital private line services which the Commission has already authorized. Pacific has taken all procedural steps ~~the Commission ordered~~ including notice as required under the Commission's Practice and Procedure Rule 24, and Pacific is prepared to conduct any workshop which the Commission deems necessary, on November 1, 1988, or as soon thereafter as is practicable for all workshop participants.

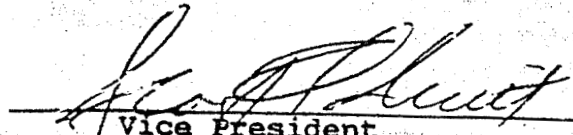

Pop all of the above, Pacific respectfully requests that the Commission approve, as soon as possible, its herein discussed restructured B-9 and 175-T tariffs but in no event later than January 1, 1989.

Dated at San Francisco, California, this 5th day of October, 1988.

B9. HIGH CAPACITY SYSTEMS

9.1 HIGH CAPACITY DIGITAL SERVICE (Cont'd)

9.i.2 REGULATIONS (Cont'd)

D. CONNECTIONS (Cont'd)

2. Connection of Customer-Provided Terminal Equipment.

Customer-provided terminal equipment may be connected at the premises of the customer or authorized user to HCDS subject to the following: no service will be provided to the premises of an other common carrier where the sole purpose of the service, including any bit streams derived therefrom, is to effect direct connection for through transmission with communications channels of an other common carrier, except that service may be provided to the premises of an other common carrier for connection to **overseas** channels furnished by that carrier.

3. Connection with Other Services and Channels

(N)

Services and Channels furnished under this Schedule are permitted to be connected with private line services, with private line channels, or with private line like services as described in Schedule Cal.P.U.C. No. A10.2 furnished by the Utility.

(N)

E. RESPONSIBILITY OF THE CUSTOMER

1. HCDS is available under this tariff for use in connection with terminal equipment provided by a customer or authorized user. The operating characteristics of such equipment or systems shall be such as not to interfere with any of the services offered by the Utility. Such use is subject to further provisions that the equipment provided by a customer or authorized user does not endanger the safety of Utility employees or the public; **damage**, require change in or alteration of the equipment or other facilities of the Utility; interfere with the proper functioning of such equipment or facilities; impair the operation of the Utility's facilities or otherwise injure the public in its use of the Utility services. Upon notice from the Utility that the equipment provided by a customer or authorized user is causing or is likely to cause such **hazard** or interference the customer shall take **such** steps as shall be necessary to remove or prevent such hazard or interference.

- 1.1 HIGH CAPACITY DIGITAL SERVICE (Cont'd)  
1.1.2 REGULATIONS (Cont'd)  
H. PAYMENTS AND CHARGES FOR SERVICE (Cont'd)

2. Move Charges

(N)

A move involves a change in the physical location of one of the following:

- The point of termination at the customer premises
- The customer premises
- The point of termination at the end user premises
- The end user premises

The charges for the move are dependent on whether the move is to a new location within the same building or to a different building.

a. Within the Same Building

When the move is to a new location within the same building, the charge for the move will be an amount equal to one half of the nonrecurring charge of the Local Distribution Channel used to provide the service, (i.e., installation charge for the service termination affected, i.e., the customer premises or the end user premises.)

b. To a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply.

3. Change Charges

Changes charges are incurred as follows:

- a. A change in termination from one type LDC to another type LDC on the premises of the customer or authorized user at the customer's request will be subject to 1/2 the nonrecurring charge of the new type LDC.
- b. A change from a channel termination as described in Schedule Cal.P.U.C. No. 175-T or FCC Schedule 128, to a Local Distribution Channel (Types A-D) as described in this Schedule, will be subject to 1/2 the nonrecurring charge of the Local Distribution Channel.

1.2. REGULATIONS (Cont'd)

. CANCELLATION FOR CAUSE

The Utility, by written notice to the customer, may immediately discontinue the furnishing of HCDS without incurring liability upon:

1. Nonpayment of any sum due the Utility or
2. A violation of any condition governing the furnishing of service.

J. MAINTENANCE VISIT

The customer shall be responsible for payment of a service charge, as set forth in Schedule Cal.P.U.C. No. B8.1.18.I, for visits by the Utility to the premises of the customer or authorized user where the service difficulty or trouble report results from the use of equipment or facilities provided by the customer or authorized user.

K. ALLOWANCE FOR INTERRUPTIONS

Provisions concerning allowance for interruptions in service are set forth in Schedule Cal.P.U.C. No. A2.1.14.

L. MILEAGE MEASUREMENTS

Rate mileages for channels, as referred to in B9.1.3 following are determined in accordance with Schedule Cal.P.U.C. No. 175-T, Section 14.

ACCESS SERVICE

1. Application of Tariff

- 1.1 This tariff contains regulations, rates and charges applicable to the provision of Carrier Common Line, **End User Access**. Switched Access and Special Access **Services**, and other miscellaneous services, hereinafter **referred** to collectively as **service(s)**, provided by Pacific Bell, hereinafter **referred** to as the Utility, to customers.

All services available to customers for the purpose of originating and terminating intrastate interLATA exchange access are contained herein. In addition, provisions for intraLATA High Capacity Service are set forth in Section 7 following. (C)  
(C)

- 1.2 The provision of such services by the Utility as set forth in this tariff does not constitute a joint undertaking with the customer for the furnishing of any service.

- 1.3 The regulations, rates and charges contained herein are in addition to the applicable regulations, rates and charges specified in other tariffs of the Utility which are referenced herein.

ACCESS SERVICE

1. General Regulations (Cont'd)

2.6 Definitions (Cont'd)

Interexchange Carrier (IC) or Interexchange Common Carrier

The term "InterLATA Carrier (IC) or InterLATA Common Carrier" denotes any individual, partnership, association, joint-stock company, trust, governmental entity, or corporation including resellers and enhanced service providers authorized by the California public Utilities Commission to provide interLATA telecommunication services for its own use or for the use of its customers. InterLATA carriers can include carrier authorized by the California Public Utilities Commission to offer intraLATA high speed digital services consistent with the terms and conditions of Decision No. 88-08-059 and Decision No. \_\_\_\_\_ (C)

Interstate Communications

The term "Interstate Communications" denotes both interstate and foreign communications.

Intrastate Communications

The term "Intrastate Communications" denotes any communications within California subject to oversight by the California Public Utilities Commission as provided by the laws of the State of California.

Line-Side Connection

The term "Line-Side Connection" denotes a connection of a transmission path to the line side of a local exchange switching system.

Local Access and Transport Area (LATA)

The term "Local Access and Transport Area" (LATA) denotes a geographic area established for the provision and administration of communications service. It encompasses one or more designated exchanges which are grouped to serve common social, economic and other purposes.

ACCESS SERVICE

7. Special Access Service

7.1 General

Special **Access** Service provides a transmission path to connect customer designated premises\*, either directly or through a Utility Hub where bridging or multiplexing functions are performed. One of the customer designated premises **must** be an interexchange carrier point of presence, with the exception of multiplexed service as shown in 7.1.4 (C) following, which may connect **end** user premises to end user premises. Special Access Service includes all exchange access not utilizing Utility end office switches.

The connections provided by Special Access Service can be either analog or digital. Analog connections are differentiated by spectrum and bandwidth. Digital connections are differentiated by bit rate.

following, may be purchased for intraLATA communications connecting two end user premises within the same LATA consistent with all of the terms and conditions contained in CPUC Decision Nos. 88-08-059 and \_\_\_\_\_. This tariff **does** not permit the connection of facilities for transport from or to the end user's premises for intraLATA service of either **analog** or digital transmissions at speeds less than 1.544 Mbps.

Facilities and **services offered** hereunder are not available for **intraLATA switched** services (including without limitation, MTS, MTS-like, WATS, WATS-like, SDN, SDN-like, Megacom, Megacom-like). In addition, Shared Use of an IntraLATA High Capacity circuit with

7.1.1 Channel Types

There are nine types of channels **used** to provide **Special Access** Services. Each type has its own characteristics. All are subdivided by one or more of the following:

- Transmission specifications,
- Bandwidth,
- Speed (i.e., bit rate),
- **Spectrum**

Customers can order a basic channel and select, from a list of available transmission parameters and channel interfaces, those that **they** desire to meet specific communications requirements.

\* Utility **Centrex** CO-like switches and ports included in Public Packet Switching (PPS) service are considered to be customer premises for purposes of administering regulations and rates contained in **this** tariff.

ACCESS SERVICE

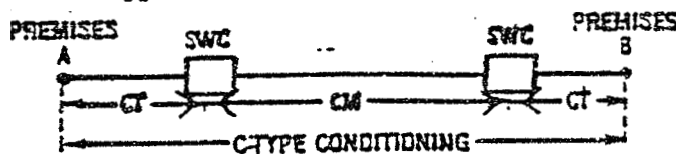

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.9 High Capacity Service

(A) Basic Channel Description

A High Capacity channel is a channel for the transmission of nominal 64.0 kbps\* or 1.544#, 3.152, 6.312, 44.736, or 274.176 Mbps isochronous serial data. The actual bit rate and framing format is a function of the network channel interface selected by the customer. High Capacity channels are provided between customer designated premises or between a customer designated premises and a Utility Hub. (C)

The customer may provide the Network Channel Terminating Equipment associated with the High Capacity channel at the customer's premises. The interim program for interconnection of such equipment is set forth in Technical Reference PUB AS No. 1.

(B) Technical Specifications Packages

Parameters	Package HC-					
	0	1	1C	2	3	4
Error-Free Seconds		X				

A channel with technical specifications package HC1 will be capable of an error-free second performance of 98.75% over a continuous 24 hour period as measured at the 1.544 Mbps rate through a CSU equivalent which is designed, manufactured, and maintained to conform with the specifications contained in Technical Reference PUB 62411

- # Available as an interLATA and limited intraLATA service offering. (N)
- \* Available only as a channel of a 1.544 Mbps facility between two Utility Digital Data Hub or as a cross connect of two channels of two 1.544 Mbps facilities at a Digital Data Hub(s). The customer must provide system and channel assignment data.

A2. GENERAL REGULATIONS

2.1 RULES (Cont'd)

2.1.33 RULE NO. 33 - BILLING SURCHARGES (Cont'd)

1.C	Rates	Monthly Percentage
	Adjustment Factor	(11.357%) (I)

The monthly percentage applies to all recurring and nonrecurring rates and charges for service or equipment provided under Schedule Cal.P.U.C. No. 175-T.

- The billing adjustment amount on each bill shall be designated "Billing Surcharge".
- The Monthly Percentage factor applies to each customer's bill for the total recurring and nonrecurring rates and charges except those items excluded in 1.A. preceding, exclusive of federal and local excise taxes, and Federal income taxes.
- The Adjustment Factor applies to the first bill date after the effective date of a change in the Monthly Percentage.
